Vertex® 60 SV MAGNESIUM HYDROXIDE

DESCRIPTION

Vertex® magnesium hydroxide products provide excellent fire retarding and smoke suppression performance for the thermoplastic and elastomeric compounds. At 330°C, they decompose in an endothermic reaction to form water and magnesium.

Vertex 60 SV is a magnesium hydroxide product surface treated with a proprietary surface treatment that provides superior fire performance when used to make fire-rated polyolefin compounds. The proprietary surface treatment improves compounding rheology and processing as well as compound physical properties.
